35. (Amended) A system for cleaning pressurized containers containing chemicals comprising:

a container having a quantity of chemicals therein wherein the container has a plurality of valves for attaching a plurality of pipes thereto;

an intake means for blowing air into the container via a first pipe; [and]

a tank comprising a neutralizing material connected to the container via a second pipe[.]; and

a vacuum pump disposed between the container and the tank for pumping the chemicals from the container to the tank,

wherein a third pipe extends from the container to the vacuum pump and further wherein a fourth pipe extends from the vacuum pump to the tank comprising the neutralizing material.
